## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of the species shown in figs. 1-5 in Paper No. 4 is acknowledged. Claims 1-6 read on the elected species and will be examined on the merits as follows.

Claims 7-20 are withdrawn from consideration as being drawn to non-elected subject matter.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Mori et al 5190499.

Mori shows in fig. 1 a folding mirror device including a base(1) mountable to a vehicle body, a support shaft(2), a case(3) installed on the shaft and including support portion(3d) connected to a bottom portion by a rib(3e) which extends radially out from the support portion, a positioning mechanism(14,etc.) for holding/moving a mirror unit(20) between viewing and folded positions. Further, a motor base with motor(14) is also shown integrally mounted with the case and includes a fitting portion fitted to the end of the shaft (note the structure which supports the motor shown in figs. 2 and 4). The mirror device is also taught to be manually swingable (see col. 5 beginning with line 39).

4. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Sakata et al 6132050.

Sakata shows in figs. 3 and 4 a folding mirror device including a base(11,12) mountable to a vehicle body, a support shaft(64), a case(52) installed on the shaft and including support portion(58) connected to a bottom portion by a rib (see fig. 3--note the rib structures extending away from the shaft between the arcuate gaps) which extends radially out from the

support portion, a positioning mechanism (see fig. 5, etc.) for holding/moving a mirror unit(31) between viewing and folded positions. Further, a motor base with motor(71) is also shown integrally mounted with the case and includes a fitting portion fitted to the end of the shaft (note the structure which supports the motor shown in figs. 1, 4, 8, etc.). The mirror device is also taught to be manually swingable (see col. 15 beginning with line 55).

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Sakata, Beuzeville, and Sakao et al all show mirror positioning systems including rib structures.
